DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor et al. P.N. 5,373,350 (Taylor).

Taylor discloses an image forming apparatus. The apparatus is described in reference to Fig.2-4 beginning at col.4. Two printing methods are used in a single page. The printing methods are xerographic and thermal ink jet respectively. The images are different as the ink jet printer is used to produce annotations into a copy produced by the xerographic printer. Note the function of controller 80. Note also the method of producing a color image described by claims 5-11.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Isobe et al., Shakaizawa et al and Maeda disclose systems using two printing methods. Note the abstract of each disclosure. Katayama discloses an apparatus for forming embossed images. Tonimori et al. discloses an apparatus that

stamps and punches holes into a sheet of paper in sequence. Note the abstract of the disclosures.
